Location: Remote / Global

About Me

Hi, I'm Abdulmaleek - a freelancer who builds smart automation tools using AI. I help businesses save time, reduce stress, and work faster by automating tasks with tools like Make, n8n, ChatGPT, and custom bots.

I work with small businesses, content creators, eCommerce stores, and startups. My goal is always simple: "Let AI do the work, so you can focus on what matters."

Services I Offer

- Chatbots (trained with your data or documents)
- Task automation using Make, Zapier, or n8n
- Auto-reply systems for emails, Instagram, WhatsApp, Facebook, etc.
- Bulk posting bots for Threads, X (Twitter), and social media
- Shopify & WooCommerce automation (order tracking, updates)
- AI dashboards and reporting systems
- Lead scraping & data extraction bots
- Voice AI (customer call simulation, lead qualification)
- Auto PDF generation & email delivery

Past Projects

1. Auto Poster for Threads + X

- Client wanted to post every hour with random photos.
- I built an n8n flow that picked images and posted to both platforms.

AI Automation Services Portfolio

- Added delay logic and random time intervals.

2. Book-Based Q&A Chatbot for Students

- Trained ChatGPT with 6 textbooks.
- Students asked questions and got exact answers from the books.
- Delivered via a chatbot UI using OpenAI API + Supabase.

3. Instagram & WhatsApp DM Automation

- Built auto-reply bots for incoming messages.
- Added delay + emoji + human-like typing.
- Helped increase client engagement by 300%.

4. AI Email Assistant

- Built automation to read customer emails.
- Auto-answered based on common questions using OpenAI API.
- Sent alerts to human staff only when needed.

5. Client Onboarding Bot for Digital Agency

- Collects client info via form > sends welcome email > assigns Notion template > notifies team on Slack.
- Saved 2+ hours daily for the agency.

Client Feedback

"Abdulmaleek helped me automate my entire IG DM funnel. Now I get leads while I sleep!" - Beauty Brand Owner

"The chatbot you built is so smart. My students love using it!" - Online Tutor

"Automation was clean, fast, and well-explained. He's my go-to guy now." - Digital Marketer

Let's Work Together!
